### RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, and 19-24, drawn to a method for improving optical recognition of text in an electronic bitmap comprising the means of receiving and processing bitmap; locating white pixels to identify gaps in character strokes; and processing black pixels by inserting bytes into white pixels for better optical recognition process classified in class 382, subclass 194.
  - II. Claims 15-18 and 25-28, drawn to a system to improve optical recognition of text in an electronic bitmap including computer environment, software program comprises receiving module, enhancement module to perform a contiguity analysis, and recognition module to recognize the text in the enhanced bitmap, classified in class 382, subclass 204.
2. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the means of receiving and processing bitmap; locating white pixels to identify gaps in character strokes; and processing black pixels by inserting bytes into white pixels for better optical recognition process. Invention II has separate utility such as computer environment; program storage; readable medium; software program comprises receiving module, enhancement module to perform a contiguity analysis, and recognition module to recognize the text in the enhanced bitmap. See MPEP § 806.05(d).

Art Unit: 2623

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
